OUTRIGGER ROLLING BRACKETS

STANDARD SCAFFOLD LADDER FOR SAFE ACCESS TO DECK

Introducing **Waco Max™**, the new standard in lightweight Aluminum Shoring Systems that increases shoring load capacities with less frames and saves valuable labor costs. The result: increased profits and more competitive bidding for you.

Waco Max™ is a safe, highly versatile solution for shoring applications where strength and versatility are important. **Waco Max™** can be assembled as a flying table with an integral deck perimeter support for easy slab edge access, and features sturdy outrigger brackets for easy rolling of the lightweight system from location to location.

Erection is a breeze, too. **Waco Max™** takes advantage of basic shoring frame erection techniques to eliminate costly field staff re-training. Best of all, **Waco Max™** is made of top quality aluminum and is carefully constructed by proud Americans.

Contact Waco to learn how you can get the **MAXIMUM** benefits for your next shoring project with **Waco Max™**.
